Work Experience

Android Developer
Ad-hoc outsourcer
June *2021 to June 2022*
(1 year)

- *Created Management android applications for companies to track issues on their products around Greece and create the most suitable communication environment for their workers.*
- This boosted the companies reaction speed for their costumers.

Full-stack web developer
Ad-hoc outsourcer
June 2021 *to February 2023*
 (2 years , 7 months)

- For the android applications to have the maximum performance they need the best back-end . During those 2 years i achieved creating server-side servers with the kotlin programming language and the Quarkus framework that can stand multiple requests per second handling a lot of data, therefore having the application running on maximum speed.
- Created web applications (front-end)for a quick visit on the workers app if they couldn't access, for various reasons, their mobile app.
- Created web applications (front-end) for the companies to manage the data of those applications and track the issues as long as their workers during their working hours

Member of lifechain team
Full-stack web developer
March 2023 - still a member
In the lifechain team i created our website, which is open source for everyone to see(lifechain.gr) and the management web-app for the organization and task assignment of our members and portion of the back-end.

Relevant Skills

- Java(very good), Kotlin(expert)
- HTML(Very good), CSS(good), Tailwind CSS(very good), JavaScript(very good), Typescript(good)
- Python(Very good)
- Next.js(Very good), SpringBoot(Very good), Quarkus(Good), ReactNative(Good)
- PostgreSQL(Good)

Education History

Electrical & Computer engineering
Institution: University of Peloponnese
Started studying on the university on octomper 2022. I am the best programming student and helped on many university projects

Lower of Michigan
When i was 14 years old i was tested on the English language and managed to take the lower of Michigan and ES B.

Some information about me

Year of berth : 2003
c**itizenship**   **:** Greek
City   : Agrinio, Aitoloakarnania

General Information
I loved programming from a very young age and started learning it from websites as SoloLearn , Udemy and YouTube videos. I loved doing "challenges" and spent a lot of hours on that. Around 2021 i became pretty good at it and i thought it would be great to work as a individual (freelancer) and tried to make my passion an income source. For 2 years and 7 months i was creating mobile and web applications while studying for the University which i am currently in .
